Papers presented at the Conference on
CHIRAL SYMMETRY BREAKING IN PHYSICS, CHEMISTRY AND BIOLOGY

PREFACE
Why is chirality so important? 1
A.S. Garay

Fundamental symmetry aspects of chirality
L.D. Barron 7
Asymmetries of nature and the origin of biomolecular handedness
L. Keszthelyi 15
Racemization and the origin of optically active organic compounds in living organisms
J.L. Bada and S.L. Miller 21
Universal dissymmetry and the origin of biomolecular chirality
S.F. Mason 27
Parity violation and the origins of biomolecular handedness
G.E. Tranter 37
Parity violation and chiral symmetry breaking of a racemic mixture
R.A. Hegstrom 49
Parity non conservation: NMR parameters in chiral molecules
A.L. Barra, J.B. Robert and L. Wiesenfeld 57
Differential interactions of beta particles with liquid enantiomers and internal timing of chiral molecules
A.S. Garay 63
Selection of molecular chirality by extremely weak chiral interactions under far-from-equilibrium conditions
D.K. Kondepudi 75
Dissipative structures and amplification of enantiomeric excess (an experimental point of view)
J.C. Micheau, M. de Min and M. Gimenez 85
Search for chiral molecules and optical activity in extraterrestrial systems. Example of titan
A. Brack and G. Spach 95
Supernovae, neutron stars and biomolecular chirality
W.A. Bonner and E. Rubenstein 99

ANNOUNCEMENTS 113

CELLS
Early evolution of microtubules and undulipodia
E. Szathmáry 115
Occurrence of carotenoids and sporopollenin in *Nanochlorum eucaryotum*, a novel marine alga with unusual characteristics
M. Geisert, T. Rose, W. Bauer and R.K. Zahn 133

MODEL SYSTEMS
Replication in abstract and natural systems
G. Kampis and V. Csányi 143
Axial diffusion and wall permeability effects in perfused capillary-tissue structures
J.E. Fletcher and R.W. Schubert 153

EVOLUTIONARY AND COMPARATIVE ASPECTS OF PROTEIN BIOSYNTHESIS (Editor: A. Spirin)
On the primacy of primordial RNA
R. Cedergren and H. Grosjean 175
Proteins, exons and molecular evolution
S.K. Holland and C.C.F. Blake 181

BOOK REVIEWS 207
ANNOUNCEMENTS 210

MOLECULAR SYSTEMS
Pyroglutamyl *N*-termini of thermal polyamino acids
P. Melius and W.-L. Hubbard 213
Thermal proteinoids as excitability-inducing materials
G. Vaughan, A.T. Przybylski and S.W. Fox 219

CELLS
Hormone evolution studies: multiplication promoting and imprinting ("memory") effects of various amino acids on *Tetrahymena*
G. Csaba and Z. Darvas 225
Overlapping imprinting of oligopeptides in Chang liver cells. Data on the mechanism of hormone evolution
G. Csaba, P. Kovács, S. Tóth and S. Bajusz 231

MODEL SYSTEMS
Spontaneous formation of regions with different properties in neural nets
G.M. Guazzo 237
Is it possible to predict the outcome of peripheral nerve injuries? A probability model based on prospects for regenerating neurites
L. de Medinaceli and R.R. Rawlings 243
Rectangular game theory and metabolic response to random changes in environmental states
F.I. Maclean 259
Movements of molluscs by computer simulation
B.M. Mogg and C.A. Leguizamon 267

EVOLUTIONARY AND COMPARATIVE ASPECTS OF PROTEIN BIOSYNTHESIS

Development of structural organization of protein-synthesizing machinery from prokaryotes to eukaryotes
A.G. Ryazanov, L.P. Ovchinnikov and A.S. Spirin 275

EVOLUTIONARY THEORY

Punctualism, non-adaptationism, neutralism and evolution
M.V. Volkenstein 289

BOOK REVIEWS 305

MODEL SYSTEMS

How to correctly match 175 000 neurites: two postulates for a quick solution
L. De Medinaceli 307

A transfer-function representation for regulatory responses of a controlled metabolic pathway
N. Sakamoto 317

A universe for molecular modeling of self-replication
W.T. Jedruch and J.R. Sampson 329

On the dynamics of controlled metabolic network and cellular behaviour
S. Sinha and R. Ramaswamy 341

A numerical model for blood oxygenation in the pulmonary capillaries — effect of pulmonary membrane resistance
M. Sharan, M.P. Singh and A. Aminataei 355
